

KARTIK AZAD

Aspiring Software Engineer

Jammu, Jammu & Kashmir, India | +91 6006094748 | Kartikazad421@gmail.com | github.com/kartikazad | linkedin.com/in/kartik-azad

PROFESSIONAL SUMMARY

Computer Science graduate who has moved from testing software to building it — shipping Mini Store, a live full-stack e-commerce app (Next.js, React, MongoDB), as direct proof of the transition. Grounded in core programming (C++, Python, Java, SQL) with hands-on experience across manual QA, applied cryptography, and startup operations. Now focused full-time on landing a software engineering role, with a bias toward shipping real, working software over tutorials.

TECHNICAL SKILLS

Core: C++, Python, Java, SQL, HTML, CSS, Data Structures

Currently Building With: JavaScript (ES6+), Next.js, React, MongoDB, PostgreSQL

Tools: Git, GitHub, VS Code, Vercel

EXPERIENCE

Executive Assistant to Managing Director | Karya-AI (Founder's Office) | May 2026 - August 2026

- Designed and executed manual test cases (smoke, functional, regression, negative) across authentication, dashboard, user management, and billing modules for our B2B SaaS platform.
- Support the MVP build-out of Karya-AI's GTM orchestration platform, working directly with the Founder's Office across product and data workflows, supporting Product Management directly.
- Run outbound and outreach campaigns using drip sequences and cold email, directly supporting pipeline-building efforts.
- Create and manage newsletters on Beehiiv using AI tools and Prompt Engineering to streamline content generation.
- Coordinate priorities and communications in a fast-moving startup environment, working directly with leadership on time-sensitive tasks

PROJECTS

Mini Store — Full-Stack E-Commerce App | JavaScript, Next.js, React, MongoDB, Vercel

- Built a full-stack e-commerce demo with a live product catalog fetched from MongoDB Atlas, cart functionality using React state lifted across components, and REST API routes built with Next.js.
- Deployed on Vercel with Analytics and Speed Insights tracking real traffic and performance; public GitHub repository with full commit history. **Live link:** <https://mini-ecommerce-store-nine.vercel.app/>

Manual QA Test Suite | Functional, Smoke, Regression, Negative Testing

- Designed and executed a full manual test case suite across core modules of a B2B SaaS platform — authentication, dashboard, user management, and billing. Covering smoke, functional, regression, and negative test scenarios.
- Focused on identifying edge cases and failure points before they reached production, sharpening a QA-first mindset that now carries into how I test my own applications.

EDUCATION

Bachelor of Engineering, Computer Science

Chandigarh University, Gharuan — University Institute of Engineering | 2019 - 2023 | CGPA: 7.40

Civil Services Examination Preparation (Prelims & Mains)

Vajiram & Ravi, New Delhi | 2024 - 25

Higher Secondary Education

Aryan Public Higher Secondary School, R.S. Pura, Jammu | 2018 - 2019 | 90.6%

CERTIFICATIONS

- Python Data Structures, Introduction to Machine Learning & Introduction to AI, Building modern python applications on AWS — Coursera. **Link :** https://drive.google.com/drive/folders/1m-wg2Rn5m0ut6dhFMz_f6elzdhoKdtVy?usp=sharing

ACHIEVEMENTS & LEADERSHIP

- 1st Position, Inter-Department Debate Competition — University Institute of Engineering, Chandigarh University (Feb 2020)
- Consolation Prize at State Level Painting Competition under National Campaign on Energy Conservation (Min of Power, GOI).
